

HAFIZ UZAIR ASHRAF

Senior Full-Stack Software Engineer · AI Engineer · Team Lead

Islamabad, Pakistan (open to USA/UK/EU relocation + sponsorship) · +92 335 1314141 · uzair.m.ashraf@gmail.com · uzairashraf.com · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 9+ years building and leading fintech and enterprise products end-to-end — .NET backends, Angular/React front ends, and the Azure DevOps pipelines that ship them. Team lead on payment-processing and card-issuing platforms serving Latin American markets, engineered in PCI DSS–scoped environments and integrated directly with Mastercard, VISA, AMEX and CLAVE. Strong in Clean Architecture and Domain-Driven Design; currently integrating AI/LLM capabilities into production applications.

CORE SKILLS

- Languages:** C#, TypeScript, JavaScript, SQL
- Backend:** .NET / .NET Core (through .NET 10 LTS), ASP.NET Core Web API, EF Core, Dapper, ABP.IO, SignalR, Node.js
- Frontend:** Angular, React, React Native, Ionic, HTML/CSS, Bootstrap
- Architecture:** Clean Architecture, Modular Monolith, Domain-Driven Design, Microservices, REST APIs
- Payments & Compliance:** PCI DSS–scoped engineering, secure card-data handling, card-network integrations, transaction processing / clearing / settlement
- Data & DevOps:** MS SQL Server, MongoDB, Azure DevOps CI/CD, Git, production support
- AI (growing):** LLM/RAG integration, AI-assisted development, agentic workflows, .NET Aspire

PROFESSIONAL EXPERIENCE

Senior Full-Stack Software Engineer / Team Lead — CROEM (Pvt.) Ltd. Jan 2019 – Present · Islamabad (Fintech)

- Lead a development team across requirements, architecture, code review, deployment, DevOps and real-time production support for financial products.
- Built and operate production payment and card-issuing platforms used across Latin America, in PCI DSS–scoped environments with secure card-data handling.
- Led a transaction-processing initiative that cut processing time ~20%, improving system efficiency and client satisfaction.
- Designed robust architectures (Clean Architecture, Modular Monolith, DDD) for new financial solutions.

Full-Stack Software Engineer — FUTURESOL Mar 2017 – Dec 2018 · Islamabad

- Built an ERP solution from scratch through to production release using .NET; delivered front end, back end and the MS SQL database design.
- Drove a stability initiative (rigorous testing + debugging) that reduced post-release issues ~30%.

KEY PROJECTS

Wa! / MI Wallet — card-issuing wallet (Panama). Benefits reception, savings accounts, bill pay, QR withdrawals at 1,000+ stores.

.NET 8 API · DDD/ABP.IO · EF/Dapper/SignalR · Ionic-Angular · React · SQL Server · Azure DevOps

NeoGateway — US-based transaction-acquiring engine. eCommerce, POS, IVR, SDK and API; integrated directly with Mastercard, VISA, AMEX, CLAVE; 10+ years in production across LATAM, from processing through clearing and settlement.

.NET Framework 4 → .NET Core 3.1 · MVC/MVVM/DDD · Angular · SQL Server · Azure DevOps

MiCedulad — award-winning COVID-19 citizen-assistance platform (Panama).

.NET Core 3.1 · DDD · Ionic-Angular · React · Azure DevOps

Property Manuel — home-management SaaS for documents, warranties and manuals.

.NET 8 API · DDD/ABP.IO · EF/Dapper/SignalR · Ionic-Angular · SQL Server · Azure DevOps
